

INSTALLATION & OPERATION INSTRUCTIONS

ICW-4 INTERCOM

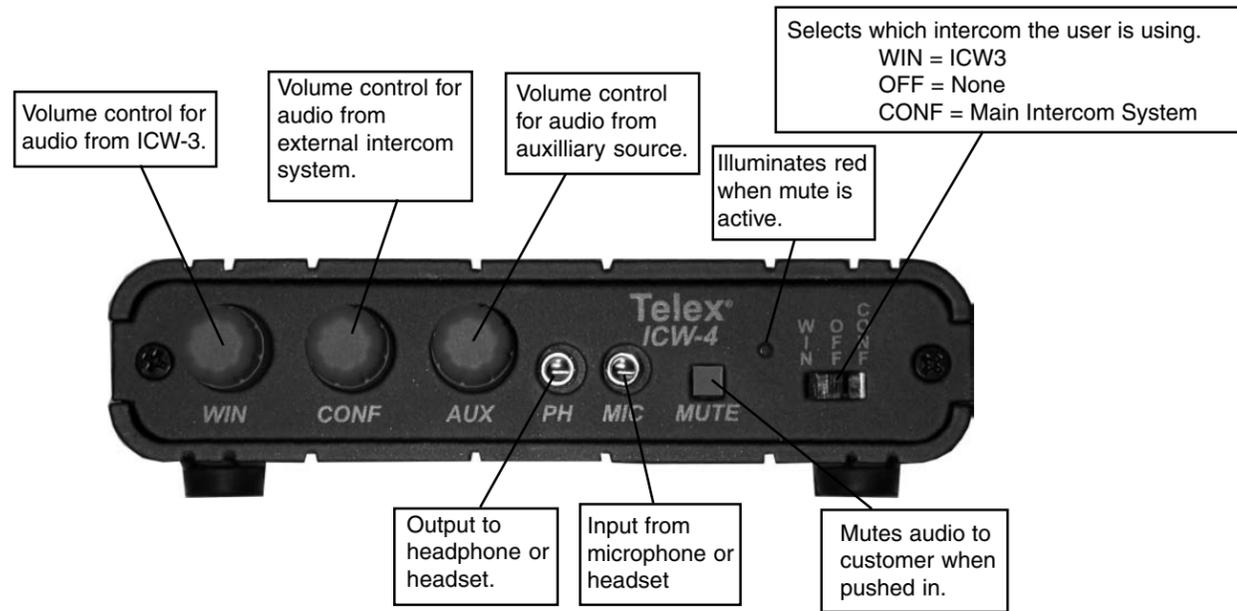

Audiocom[®]

UNPACKING & INSPECTION

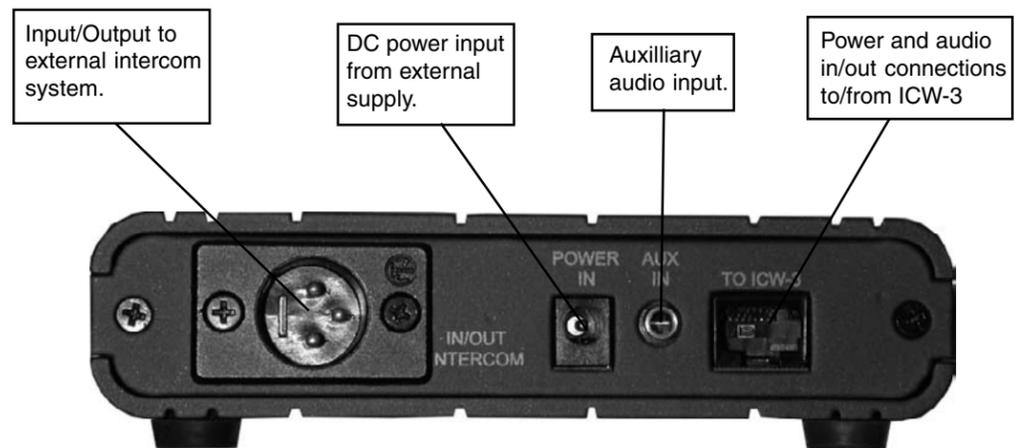

Unpack the equipment from the shipping case and inspect for missing or damaged components. You should have all of the following items:

1. ICW-4
2. RJ-45 to RJ45 Interconnect Cable

TRADEMARKS

Audiocom® is a registered trademark of Telex Communications. Names of other products mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective companies.

WARRANTY INFORMATION

Products are warranted by Telex Communications, Inc. to be free from defects in materials and workmanship for a period of one year from the date of sale.

The sole obligation of Telex during the warranty period is to provide, without charge, parts and labor necessary to remedy covered defects appearing in products returned prepaid to Telex. This warranty does not cover any defect, malfunction or failure caused beyond the control of Telex, including unreasonable or negligent operation, abuse, accident, failure to follow instructions in the manual, defective or improper associated equipment, attempts at modification and repair not authorized by Telex, and shipping damage. Products with their serial numbers removed or effaced are not covered by this warranty.

To obtain warranty service, follow the procedures entitled "Procedure for Returns" and "Shipping to Manufacturer for Repair or Adjustment".

This warranty is the sole and exclusive express warranty given with respect to Audiocom products. It is the responsibility of the user to determine before purchase that this product is suitable for the user's intended purpose.

ANY AND ALL IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY ARE LIMITED TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY.

NEITHER TELEX NOR THE DEALER WHO SELLS TELEX PRODUCTS IS LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND.

CUSTOMER SUPPORT

Technical questions should be directed to:

Customer Service Department
Telex
12000 Portland Avenue South
Burnsville, MN 55337 U.S.A
Telephone: (952) 884-4051
Fax: (952) 884-0043

RETURN SHIPPING INSTRUCTIONS

Procedure for Returns

If a return is necessary, contact the dealer where this unit was purchased.

If a return through the dealer is not possible, obtain a RETURN AUTHORIZATION from:

Customer Service Department
Telex Communications, Inc.
Telephone: 1-800-392-3497 or (952) 884-4051
Fax: 1-800-323-0498 or (952) 884-0043

DO NOT RETURN ANY EQUIPMENT DIRECTLY TO THE FACTORY WITHOUT FIRST OBTAINING A RETURN AUTHORIZATION.

Be prepared to provide the company name, address, phone number, a person to contact regarding the return, purchase order number, the type and quantity of equipment, a description of the problem and the serial number(s).

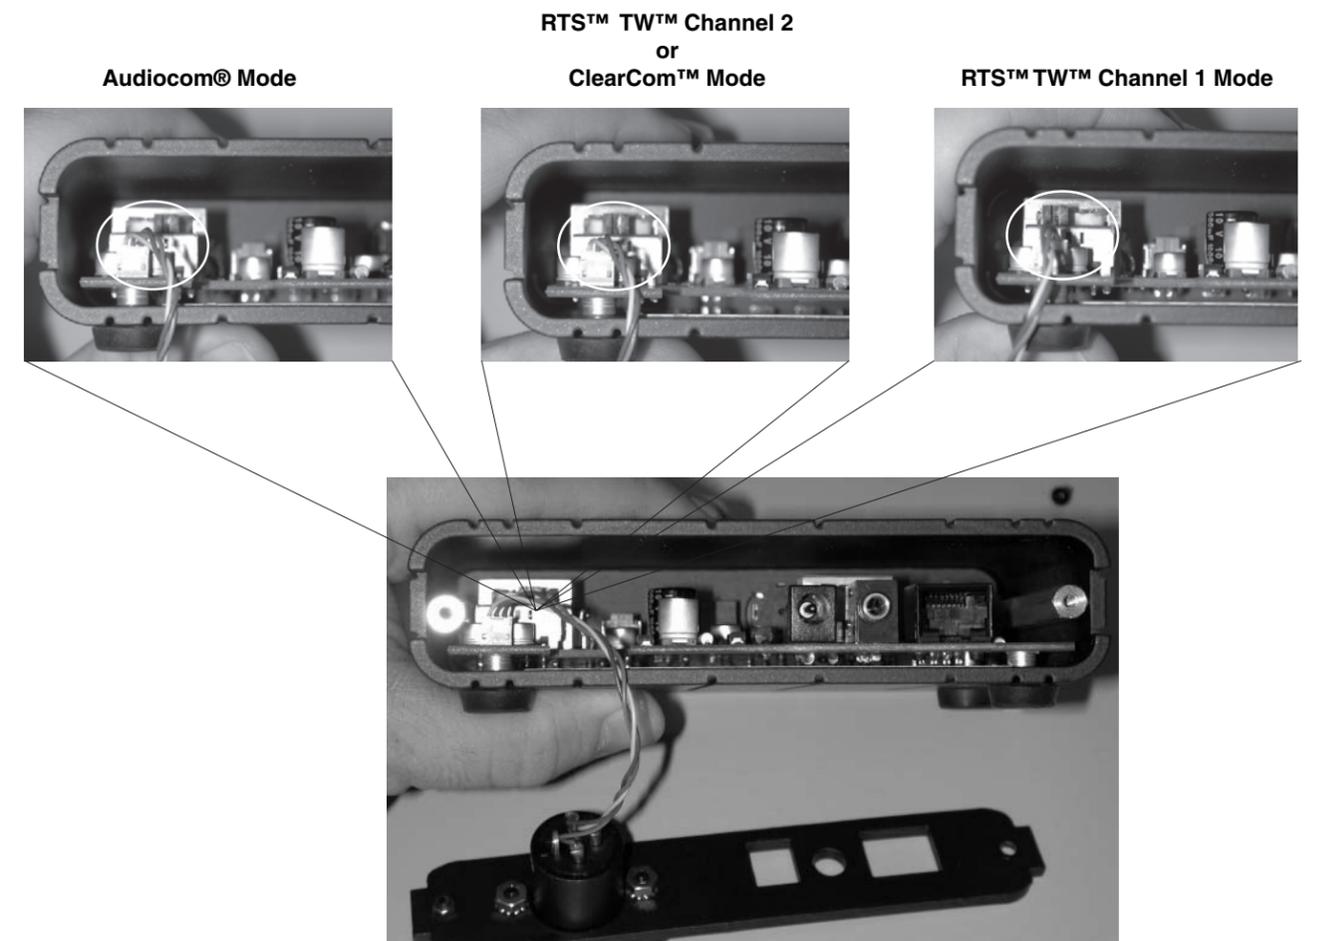

Shipping to Manufacturer for Repair or Adjustment

All shipments of products should be made via United Parcel Service or the best available shipper prepaid. The equipment should be shipped in the original packing carton; if that is not available, use any suitable container that is rigid and of adequate size. If a substitute container is used, the equipment should be wrapped in paper and surrounded with at least four inches of excelsior or similar shock-absorbing material. All returns must include the return authorization number. Units sent for repair or adjustment **DO NOT** need a return authorization number

Factory Service department
Telex Communications, Inc.
West 1st Street
Blue Earth, MN 56013 U.S.A.

Upon completion of any repair the equipment will be returned via United Parcel Service or specified shipper collect.

SETUP

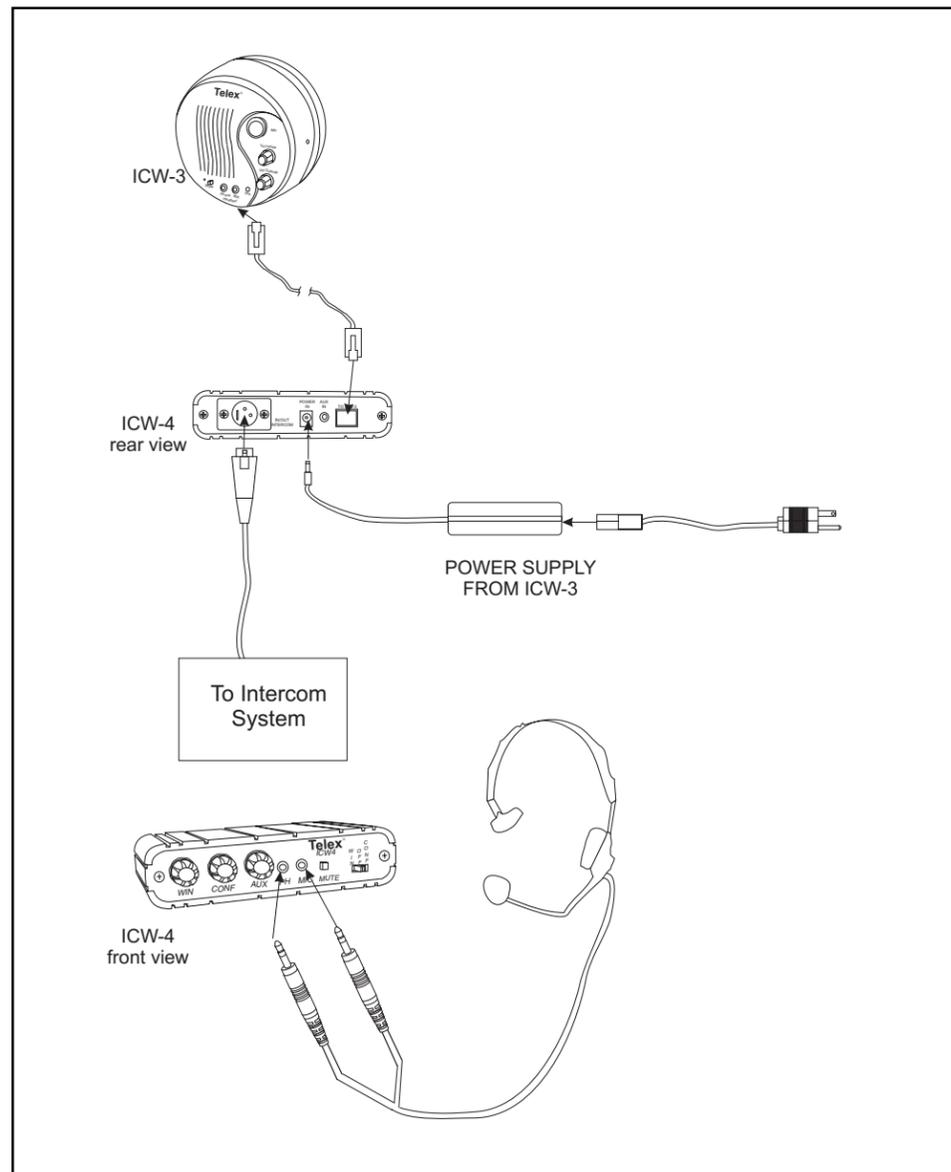

1. Determine which type of main intercom system you have. The ICW-4 supports connections to RTS™ TW™ channels 1 or 2, ClearCom™, and Audiocom® systems.
2. To configure the ICW-4 for a given main intercom system, do the following:
 1. Remove the two screws holding the rear cover on the ICW-4 and carefully remove the cover.
 2. Locate the mode select switch. It is located on the left side of the PC board as viewed with the rear cover off.
 3. Set the switch for the appropriate mode. (See Figure Above)
There are three positions:
LEFT = RTS™ TW™ Ch 1
CENTER = RTS™ TW™ Ch 2 or ClearCom™
RIGHT = Audiocom®.
 4. Carefully place the rear cover back on the unit being sure that the wiring harness is not pinched.
 5. Insert and secure the two screws to hold the cover on.

Note: The following instructions assumes that the ICW-3 is mounted, but not connected to any wiring or microphones. See the connection diagrams on the next page for a pictorial view of these instructions.

3. Insert one end of the RJ-45 to RJ-45 link cable into the connector on the bottom of the ICW-3 and insert the other end into the connector on the rear of the ICW-4.
4. Insert the barrel connector of the switching power supply (the one included with the ICW-3) into the power jack on the rear of the ICW-4.
5. Insert the IEC line cord into the connector on the power supply.
6. Wire a cable for interconnection to the main intercom system and insert it into the XLR connector located on the rear of the ICW-4. (See the SPECIFICATIONS section for the correct pinout for your particular Intercom system.)

SETUP PROCEDURE CONTINUED ON NEXT PAGE

7. (Optional) Insert the auxiliary audio feed into the AUX IN jack. See the specifications section for connector wiring information.
8. Connect the headset or headphone and microphone to the unit.
9. Set the slide switch (intercom select) on the right front of the ICW-4 to the WIN position.
10. While talking at a normal level, have an assistant monitor the ICW-3's audio output on the customer side while you adjust the Outside Volume control on the ICW-3 until it is at an acceptable level for the assistant.
11. Have an assistant talk at a normal level and adjust the WIN Volume control on the ICW-4 until it is at an acceptable level in the headset or headphones.
12. Set the slide switch (intercom select) on the right front of the ICW-4 to the CONF position.
13. While talking at a normal level, have an assistant make appropriate adjustments to the receive audio levels for the main intercom system.
14. Have an assistant talk at a normal level over the main intercom system and adjust the CONF Volume control for an acceptable level in the headset/headphone.
15. (Optional) Set the slide switch (intercom select) on the right front of the ICW-4 to the OFF position.
16. (Optional) Place program material of a typical level on the Auxiliary audio feed and adjust the AUX Volume control for an acceptable level in the headset/headphone.

OPERATION

To talk to customers through the ICW-3 intercom, set the slide switch located on the right front of the ICW-4 to the WIN position. You can use the Mute switch on the front of the ICW-3 or ICW-4 to temporarily mute the audio that the customer hears.

To talk to others on the main intercom system, set the slide switch located on the right front of the ICW-4 to the CONF position.

To prevent placing audio on either the ICW-3 or main intercom system, set the slide switch located on the right front of the ICW-4 to the OFF position.

At all times, and regardless of the slide switch position, you will be able to hear the auxiliary audio feed (if present).

SPECIFICATIONS

Overall

Power Requirement:	12 to 15 VDC, 200 mA nominal (powers ICW-3 as well)
System Frequency Response:	200 to 4.5 kHz \pm 3 dB
Environmental:	0 to 55°C, 0 to 90% Humidity, non-condensing
Physical:	1.44" (36 mm)H x 5.27" (134 mm)W x 4" (102 mm)D; 0.88 lbs (0.4 kg)

Outputs

Headphone:	Headphone impedance: 25 ohms, 31 mW, 109 dB peak SPL, Voice range: 84 to 109 dB SPL
	Headphone impedance: 150 ohms, 15 mW, 106 dB peak SPL, Voice range: 81 to 109 dB SPL

Input/Output

House Intercom:	Printed circuit board switch to select: 1) RTS™ TW™, channels 1 or 2 2) AudioCom® (balanced) 3) Clear-Com™ (unbalanced, single channel) System levels range from -10 dBu to 0 dBu into 200 to 300 ohms. Unit uses a bilateral current source.
------------------------	---

Input

Headset Microphone:	Dynamic or Electret range: 2 to 15 mv @ 1 kHz typical into 1000 ohms. Source impedance dynamic: 200 ohms. Source impedance electret: 1000 ohms.
----------------------------	--

Rear Panel

RJ45:	Interconnects to ICW-3
Phone Jack:	Minature 3.5 mm connection for Aux. In. Balanced 0 dB line level input. Tip, Audio +; Ring, Audio -; Sleeve, N.C.
Power Connector:	DC power input, 12 to 15 volts, 150 to 200 mA. Jack: 2.5 mm, center positive.
Intercom Connector:	Connects to House Intercom line.
RTS™ TW™:	Pin 1, common; Pin 2, Channel one; Pin 3, Channel two
Clear-Com™:	Pin 1, common; Pin 2, power; Pin 3, audio
AudioCom®:	Pin 1, common; Pins 2, 3 balanced audio, phantom power
