Innovating the Future of Communications

Installation Instructions
TM-2000 and MTM-2000
8-Port PCI Card Kit

TM-2000 Installation

WARNING:	Always connect and disconnect your field cabling with the computer power off. Always turn computer power off before installing a card, connecting and disconnecting cables, or installing cards into a system with the computer or field power on may cause damage to the I/O card and will void all warranties, implied or expressed.

CAUTION:	ESDA single static discharge can damage your card and cause premature failure! Please follow all reasonable precautions to prevent a static discharge such as grounding yourself by touching any grounded surface prior to touching the card.

To **install the TM-2000 8-Port PCI card**, do the following:

1. Remove the **four (4) screws** securing the top cover to the TM-2000 unit (two [2] screws on either side of the unit).
2. Remove the **top cover** from the TM-2000.
3. Remove the **screw** holding the blank plate in place.

Card Screws

Detail A

4. Remove the **blank plate**.
5. Place the **8-port PCI card** in the desired slot, securing it to the PCI connector.

PCI Connector

6. Secure the **PCI card** in place with the designated screw.
7. Replace the **top cover** on the TM-2000.
8. Secure the top cover with the **designated screws**.

NOTE:	If an interrupt conflict occurs on power up, a BIOS modification may need to be done.
